ENVIRONMENTAL & SAFETY CONSULTANTS
Statement of Qualifications:
Air Quality Solutions

AIR QUALITY

Alta Environmental specializes in air quality management services pursuant to the South Coast Air Quality Management District, California's Air Pollution Control Districts, the California Air Resources Board, and Federal criteria.

Our experience, speed and efficiency enables us to pull more permits than any other environmental consulting firm and service a range of needs, from simple field monitoring to extensive reporting that requires emissions modeling and thorough regulatory analysis.

Alta has completed air compliance projects for facilities such as refineries, power plants, waste water treatment plants, municipal water treatment plants, subsurface remediation facilities, textile dyeing plants, aerospace facilities, and food processors.

OUR MAIN SERVICES INCLUDE:

Air Permits – Various air districts in Western USA (South Coast Air Quality Management District Certified Consultants)

Obtaining Air Permits can be a complex and long process. Alta can assist in expediting the project through the regulatory maze. Our services include interfacing with agencies and clients in the preparation and submittal of air quality permits.

CARB Portable Equipment Registration Program Applications (PERP) & Annual Reports

The CARB's PERP allows specific types of portable equipment to operate anywhere in the state of California. The Alta Air Team has been assisting business for over 20 years in understanding the restrictions and benefits of the PERP. This includes the preparation and submittal of the registration paper work and assisting with compliance conditions.

Electronic Reporting for RECLAIM

Our Air Quality team has been assisting facilities since the beginning of the program to keep on top of the demanding regulatory requirements of the RECLAIM program. This includes Monthly, and Quarterly electronic transmissions and record keeping requirements, regular compliance reminders on critical tasks, and modification/ permitting assistance.

- Additional Air Quality services include:
- Air toxic "Hot Spots" plans and reporting
- Air quality compliance audits
- Compliance Assurance Monitoring (CAM) plans
- QA/QC dispersion modeling
- Visible emissions and dust control plans
- Greenhouse gas programs
- Health Risk Assessments (HRAs)
- NESHAPs compliance assistance
- New Source Review (NSR) evaluations
- NOV resolution, enforcement assistance & compliance plans
- Stationary source emissions testing, evaluations & compliance plans
- Title V permitting, compliance & auditing
- VOC emissions quantification & compliance evaluation
- EPA Toxics Release Inventory Program (Form R)
