

# LEGITIMATE RECYCLING OF HAZARDOUS SECONDARY MATERIALS

## UNDER 40 CFR 260.43

### EXAMPLES:

- Contributes valuable ingredients to product or intermediate
- Replaces a catalyst or carrier to the recycling process
- The source of a valuable constituent recovered in the recycling process
- Recycled or recovered by the recycling process
- Used as an effective substitute for a commercial product

### EXAMPLES:

- Sold to a third party
- Used as an effective substitute for a commercial product
- Used as an ingredient or intermediate in an industrial process

### EXAMPLES:

- Managed in the same manner as an analogous product
- Contained (i.e., in containers, tanks, containment piles) if no analogous product exists

### EXAMPLES:

- Meets commodity specifications (including scrap metal)
- Returned to the industrial process from which it originated \* (Closed-loop recycling)
- Does not exhibit a hazardous characteristic which the analogous product does exhibit
- Does not contain hazardous constituents at higher concentrations than products made from raw materials
